

EPR Overview for France

France is a leader in EPR, with comprehensive schemes covering many sectors, and a strong focus on the circular economy.

Mattresses: France has a formal EPR system for mattresses, managed by Éco-mobilier. Producers contribute to a fund for collection and recycling.

Furniture: EPR for furniture is well-established in France, with organizations like Éco-mobilier managing the process. Producers are responsible for financing collection, recycling, and reuse efforts.

Electric Appliances: France follows the WEEE Directive with a comprehensive system for e-waste. Organizations like Eco-systèmes manage collection and recycling, ensuring producers meet their obligations.
